EXPERIENCE

Arch Capital Management Inc.

Remote

Incoming Quantitative Research Internship

October 2026

J.P. Morgan Chase & Co.

New York City, NY

Global Private Bank Investment Solutions Summer Analyst

June 2026 - August 2026

- Built model decomposing MOO Agribusiness ETF to assess portfolio exposure and company-level sensitivity to El Niño
- Presented an agricultural commodities thesis to 25+ professionals, identifying opportunities from El Niño and fertilizer constraints, and recommended managers with a strong track record of performance in capturing similar opportunities
- Supported Senior PM's investment thesis on diversified global utilities with fundamental research of National Grid [NG]
- Analyzed eight portfolios for benchmark replication and net expenses, identifying two potential replacement vehicles
- Built five AI-integrated workflow tools to automate message drafting, presentation review with macros, weekly performance/trade consolidation for marketing, and monitoring of agricultural commodity themes and price targets

Morgan Stanley, Parametric

Minneapolis, MN

Investment Strategy Analyst

June 2025 - August 2025

- Developed 11 factors targeting systematic alpha in commodities, leveraging 15+ academic papers and internal analysis
- Built time series with 30 commodity sub-indices [1960–2025] of Futures and Forward price data using BCOM and GSCI
- Validated L/S factor returns significance at 95% with statistical testing [t-tests] and bootstrapping [confidence intervals]
- Conducted OLS regressions, active exposures, and attribution models for the five factors that demonstrated risk premia

Driftwood Heritage Holdings

Columbus, SC

Business and Deal Sourcing Intern

June 2024 - August 2024

- Reviewed the CIM for an LMM HVAC firm to develop a three-statement model and forecast to aid investment decisions
- Targeted and sourced 700+ key contacts from companies across four states for the strategic outreach efforts of the firm
- Enhanced internal sourcing practices by introducing software tools [Contact Out, Hunter.io, Cohesive AI] firm-wide

LEADERSHIP AND ACTIVITIES

Two7 Unsuit Investments

Atlanta, GA

Co-Founder, Head of Education

January 2026 – Present

- Executed a six-week training program, teaching finance fundamentals and market primers in daily meetings to analysts

Selected Research Experience

▪ **Short Recommendation on Sally Beauty Holdings (NYSE: SBH)**

- Built a downside-driven DCF [6.63% WACC, 2% TGR] and multiple analyses implying a \$4.92 price target [~70% downside], supported by structural margin compression, e-commerce cannibalization, and price-taking behavior
- Analyzed 2,564-store foot traffic data, finding unit economics [\$855K avg. revenue/store], and stagnant inventory turnover [~1.9x] to quantify fixed-cost deleverage as a core thesis fulfillment-driven gross margin fragility trends
- Identified Catalysts of supplier disintermediation [Wella IPO], remodel risk, and failure of recession hedge thesis

Blockchain at Emory

Atlanta, GA

Co-Founder, Head of Research and Investments, COO

May 2025 - Present

- Leading 15+ projects developing quantitative risk modeling and market research on Blockchain and Web3 Applications

Selected Research Experience

▪ **Multi-Factor Asset Pricing Model Applied to Cryptocurrencies**

- Built a daily long-short multi-factor model across 12 major tokens, constructing Market, Momentum [30-day], Value [120-day and quality proxy], Liquidity, Beta, and Residual Volatility signals to evaluate systematic risk premia
- Ran benchmark/asset-level regressions on BTC, ETH, and SOL [R^2 up to 0.94], decomposing return drivers and identifying Liquidity and Value-Quality as statistically significant contributors while Momentum failed to persist
